

## High performance meets low environmental impact and cost

**Ranpak GreenLine™** void fill paper protects what's in the box while also protecting the environment and your bottom line. As the void fill market continues looking for ways to reduce packaging costs and consumer demand for eco-friendly solutions increases, GreenLine meets the need for both.

**GreenLine** is a 100% recycled paper, derived from post-consumer waste (PCW). As a result, the production of a short ton of GreenLine diverts 1,200 pounds of waste from our landfills. GreenLine is also curbside recyclable and biodegradable after use. Finally, GreenLine delivers effective void-fill protection to e-commerce and industrial supply chains.

### Durable Protection

Thick, durable paper fills and protects.

### Cost Effective

Low TCO when compared to alternatives.

### 100% Sustainable

Curbside recyclable, biodegradable and entirely paper based.

100% Recycled PCW Paper

greenline™

- Soft to the touch so it's easier on hands
- Suitable for high volume operations
- All of our paper suppliers are FSC and/or SFI certified. Using paper that is curbside recyclable and biodegradable, Ranpak offers a complete paper-based delivery method that is more sustainable than alternatives.

MONTENEGRO

## Sustainable, Durable Void Fill

**GreenLine** is the recycled, PCW, environmentally-friendly void fill packaging solution that does not compromise. It delivers outstanding void-fill protection – and because it is curbside recyclable and biodegradable, it can easily be recycled into new products. In other words, using GreenLine keeps natural resources available, and paper out of the landfill.
